DETAILED ACTION

1. Applicant and the assignee of this application are required under 37 CFR 1.105 to provide the following information that the examiner has determined is reasonably necessary to the examination of this application. The applicant must provide copies of the foreign documents listed on the PTO-1449; namely, FR 2,581,602, GB576,954, and PCT 98/31250.

Claim Objections

2. Claim 4 is objected to because of the following informalities: claim 4 states that the weight sensor can be located in the "handle" or the "top of the container"; but claim 1 states that the container "does not have to be suspended off of the ground to determine its weight". If this limitation in claim 1 means anything at all, then the weight sensor cannot be in the handle, side, or attached to the top. Appropriate correction is required.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 2841
